Visakhapatnam, India

UI/UX Designer with 2 years of experience crafting intuitive digital products for fintech and enterprise platforms. Expert in translating complex business requirements into clean, accessible interfaces that drive measurable outcomes.

EXPERIENCE

- Senior UI/UX & Motion Graphics Designer

Savart, Hyderabad

May 2024 – Present

 - Led end-to-end UI/UX design for B2C investment advisory mobile application serving retail investors, featuring portfolio tracking, goal-based investing, and personalised onboarding and collaborated with product and engineering teams to ship within sprint cycles
 - Designed and delivered **12+ high-conversion marketing pages** (homepage, pricing, PMS, enterprise, savart one, APART AI & marketing campaign landing pages) presented design rationale to C-level stakeholders and achieved sign-off within review cycles
 - Designed entire web app for a fintech stock research platform with **5+ core modules**: custom screeners, query builder, multi-watchlist management, and financial data visualisation (balance sheets, P&L, cash flows)
 - Extended platform scope to include IPO and Mutual Fund research and delivered **within 45-day timeline** while maintaining seamless cross-asset user experience
 - Designed AI-powered sports analytics mobile application supporting **10+ athletic performance tests** with real-time video analysis, pose estimation feedback, and centralised reporting dashboard
 - Designed enterprise CRM platform with **6 integrated modules**: permissions manager, prospect/investor tracking, task management, portfolio review automation, and multi-channel communication (Email, WhatsApp)
 - Developed motion design strategy and micro-interactions across product suite and improved perceived performance and user delight through purposeful animation
 - Built scalable design system ensuring cross-product consistency and facilitated faster design-to-dev handoff through documented component library and design tokens
- UI/UX Design Intern

Heamac Healthcare, Remote

March 2024

 - Improved healthcare workflow task completion by **25%** through user research-driven redesign and simplified navigation
 - Reduced UI bugs by **25%** by establishing Figma documentation standards and design QA processes
 - Created mobile-first responsive patterns improving cross-device consistency and accelerating stakeholder approval

SKILLS

Design Tools

Figma, Framer, Spline, After Effects, Zeplin, Webflow, Canva, Notion

AI & Generic

ChatGPT, Midjourney, DALL-E, Runway, Hugging Face, Flux, Claude

UX Methods

User Research, Journey Mapping, Usability Testing, A/B Testing, Wireframing

Design Systems

Component Libraries, Design Tokens, Documentation, Accessibility

Soft Skills

Cross-functional Collaboration, Stakeholder Management, Presentation

EDUCATION

B.Tech in ECE

Raghu Engineering College
2021 – 2024

Diploma in ECE

VSM College of Engineering
2018 – 2021

LEARNINGS (YOUTUBE)

Advanced Figma - BYOL

Figma Tricks - Figma Office Hours

Design Systems - UI Collective

Generative AI - FreeCodeCamp
